

IF YOU DON'T CONTROL IT, YOU CAN'T SECURE IT.

THE SOFTWARE SUPPLY CHAIN REQUIRES
DEVOPS-CENTRIC SECURITY

JFROG ADVANCED SECURITY

WORLD'S 1ST DEVOPS-CENTRIC SECURITY SOLUTION

JFrog Advanced Security augments JFrog Xray to combat against software supply chain threats.

THE INDUSTRY'S FINEST RESEARCH SECURITY TEAM

JFrog Advanced Security includes the JFrog Security Research Team's proprietary data on CVEs and malicious packages, as well as granular remediation and mitigations instructions.

BRIDGE THE GAP BETWEEN DEVOPS AND SECURITY

JFrog provides a unified Platform that bridges the gap between DevOps and Security teams, driving a single source of record for software supply chain security.

5 NEW CAPABILITIES TO ELIMINATE SECURITY BLIND SPOTS

- Container Contextual Analysis
- Secrets Detection
- Insecure Use of OSS Libraries
- Services Configuration Security
- Infrastructure-as-Code (IaC) Security

17,000

Malicious Packages in Xray Database

1,430+

Malicious Packages Discovered

~1,000

Unique CVE Articles Added to Xray DB

500+

Zero-day Vulnerabilities Discovered

90+

Vulnerabilities Discovered

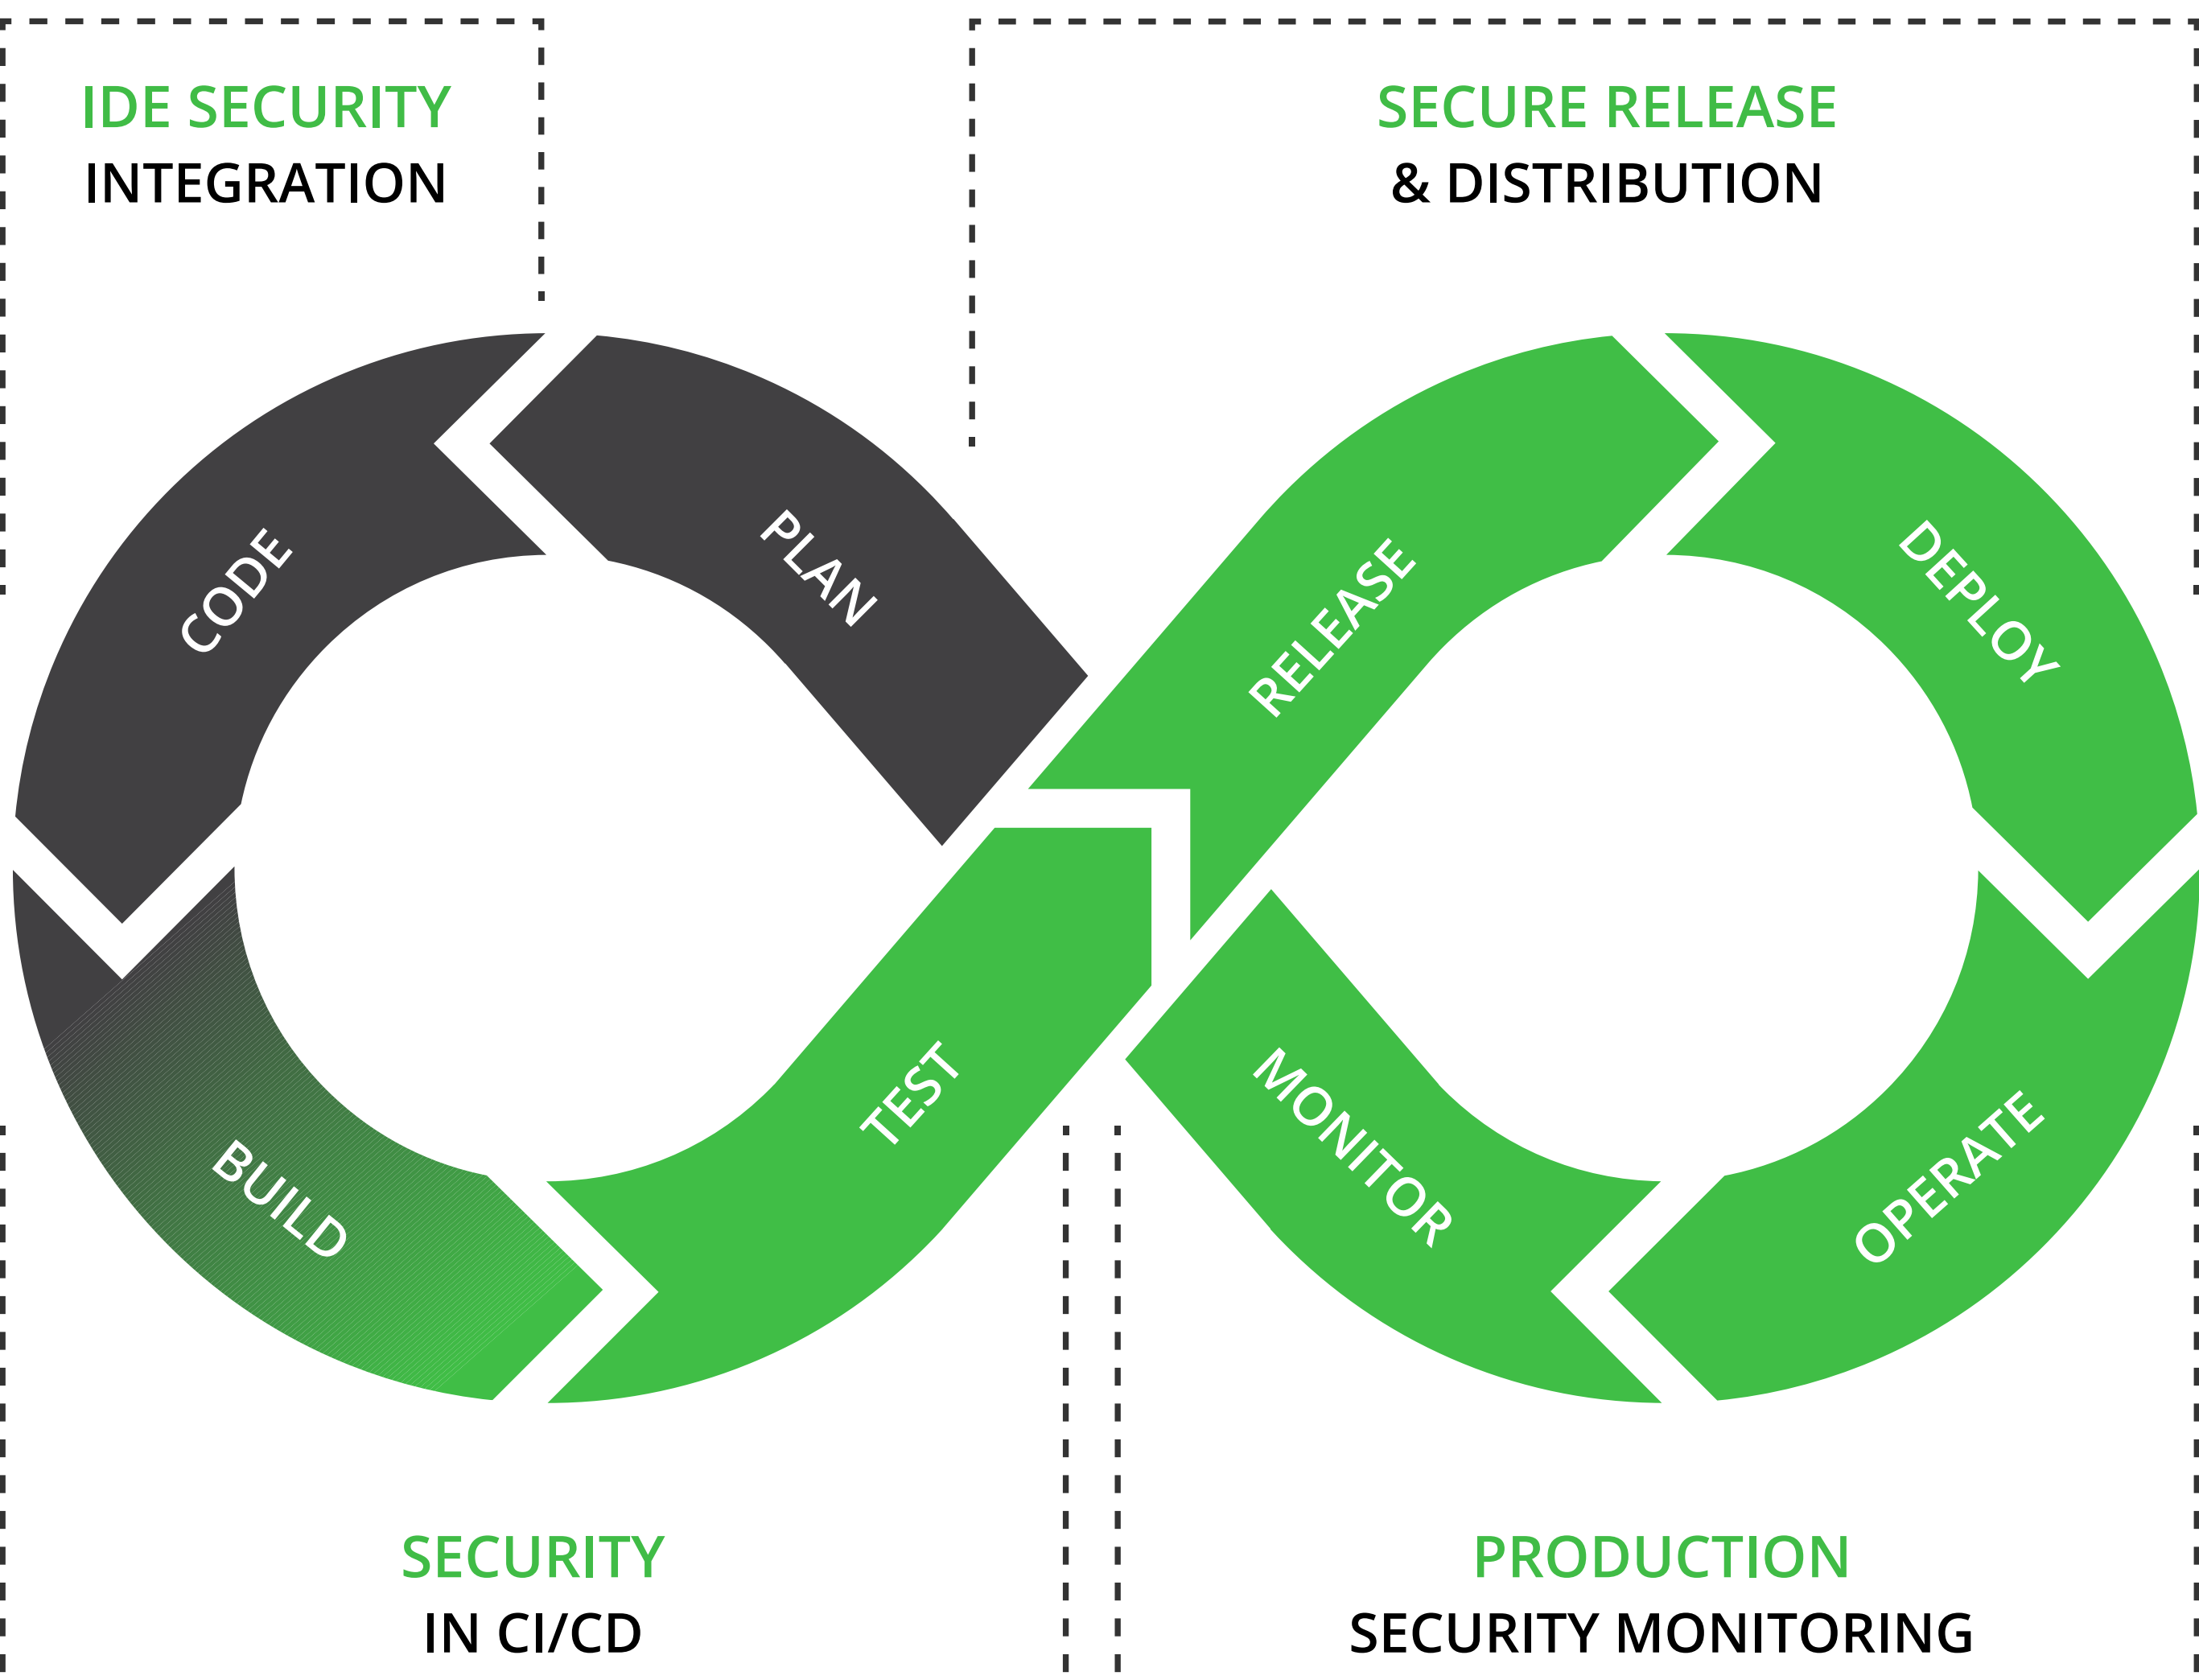

16

OSS Tools Released

"The mix of security point solutions to manage software often delivers an incomplete view of what was happening and what is needed when threats arise. JFrog Xray's advanced security capabilities brings a fuller picture that can keep developer, ops, and security teams happy with intuitive, DevOps-centric workflows that allow the delivery of secure, high quality software at business speed."

ANDRES ALMIRAY, SENIOR OPEN SOURCE DEVELOPER AND APACHE GROOVY PMC

THE ONLY END-TO-END HOLISTIC SECURITY SOLUTION INTEGRATED INTO YOUR DEVOPS WORKFLOW
