POWERING THE SOFTWARE THAT POWERS THE WORLD

Trusted by nearly 90% of Fortune 100 companies, JFrog provides the most comprehensive Artifact Management and Application Security solution in the industry, utilized by over 7,000 organizations around the world.

JFrog is *the* Software Supply Chain Platform to manage, secure, and automate delivery of trusted software releases - no matter where you build and run software.

We're the single source of truth for all software components used and generated in the development process, allowing organizations to implement fully automated quality controls that ensure the highest level of security and compliance over software releases.

Our platform bridges DevOps, Security, and MLOps to improve velocity, deliver scalability, and provide unrivaled transparency across software development workflows.

We provide an array of solutions that have enabled many companies to overcome some of their greatest challenges. These solutions include:

JFrog Software Supply Chain Platform - control the flow of your binaries from build to production.

JFrog ARTIFACTORY

– a single solution for housing and managing all the artifacts, binaries, packages, files, containers, and components for use throughout your software supply chain.

JFrog XRAY

– definitive DevOps-centric software composition analysis to identify and resolve security vulnerabilities and license compliance issues in your open-source dependencies.

JFrog DISTRIBUTION

– enables you to speed up deployments and concurrent downloads at scale to get your software where it needs to be ASAP.

JFrog CURATION

– defends your software supply chain, enabling early blocking of malicious or risky open-source packages before they even enter.

JFrog PIPELINES

– an automation solution for end-to-end optimization for building, testing, and deploying software in your DevOps pipeline.

JFrog ADVANCED SECURITY

– advanced security features save development, DevOps, and security teams time to create trusted releases.

JFROG IS UTILIZED BY 89 OF FORTUNE 100 COMPANIES.

JFrog

MONSTER

CUSTOMER STORY

Monster is recognized as one of the top companies in the recruiting industry, leveraging advanced technology to connect people with jobs.

After 20 years of market leadership, they wanted to refresh their core technologies, requiring a reinvention to make them cloud native, built around containerized microservices architectures and Kubernetes.

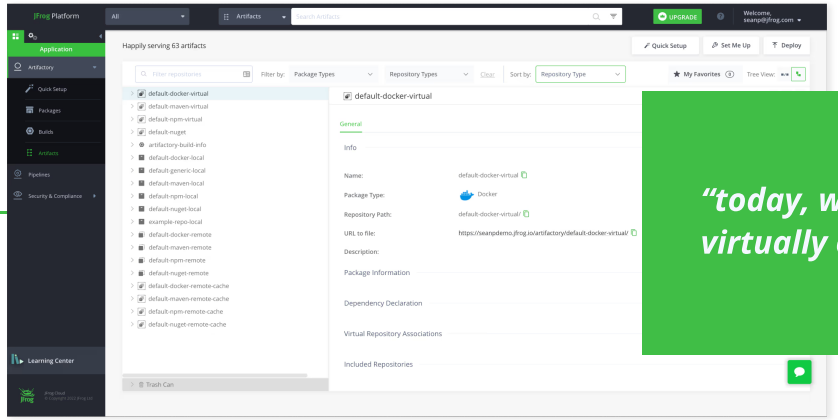

"IT BECAME VERY, VERY OBVIOUS VERY QUICKLY THAT WE HAD TO GO FOR A COMPLETE DIGITAL TRANSFORMATION OF THE MONSTER ENGINEERING ORGANIZATION."

MONSTER

With 90+ developers spread across 15 global teams building core applications, JFrog's Artifactory solution provided a virtual repository to unify local package management with cached access to remote resources.

In addition, JFrog's Xray helped Monster become more vigilant against all vulnerable components and builds before they reach production.

"today, we can release virtually on request"

Using the JFrog build integration for Jenkins, Monster now promotes cloud native builds through Artifactory repositories for development, testing (including Xray vulnerability scanning), and staging.

As a result, their previous 15-month development cycle is now near immediate.

JFrog

HOW DID JFROG SUPPORT A MAJOR BANK'S SEAMLESS CLOUD MIGRATION?

BENDIGO AND ADELAIDE BANK

CUSTOMER STORY

As one of Australia's biggest banks Bendigo and Adelaide Bank employs over 4,800 employees, helping more than 2 million customers achieve their financial goals.

While successful, they knew they needed to evolve to stay competitive, with the goal of transitioning at least 80% of their applications into the cloud while maintaining compliance with rigorous banking regulations.

JFrog ARTIFACTORY

JFrog XRAY

With JFrog's Artifactory and Xray enabling 500 developers to safely use 15 unique package types (primarily Maven, Ruby Gems, and Docker) across 600+ cloud native applications, the DevOps team was in good hands.

They chose Amazon Web Services (AWS) EKS to host the Artifactory repository and Xray security, within a single hour, they were able to spin up a test or production cloud environment for the JFrog Platform

While adhering to all compliance and governance procedures the cloud migration of all data and teams into the new AWS environment was completed within six months.

As a result, production greatly accelerated, improving build times 30-40 percent and greatly reducing costs.

"SOME PEOPLE DIDN'T EVEN REALIZE THAT IT'S NOW RUNNING ON AWS, AND NOT RUNNING ON-PREM ANYMORE."

– CAIO TREVISAN, TECHNOLOGY DIRECTOR – DATA AND DEVOPS PLATFORMS, BENDIGO AND ADELAIDE BANK

HOW DID JFROG HELP A DATA STORAGE SYSTEMS PROVIDER ACCELERATE PIPELINES WITH MULTI-SITE, HYBRID DEVSECOPS?

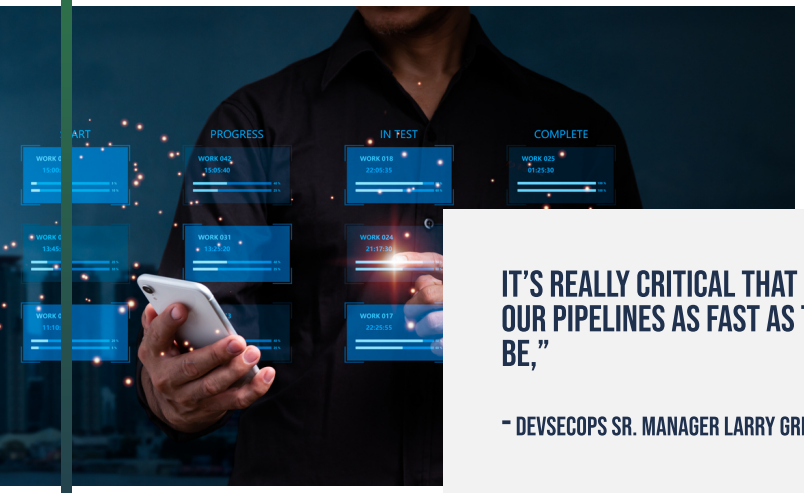

HITACHI VANTARA

CUSTOMER STORY

As a top data storage system provider serving over 80% of Fortune 100 companies in more than 100 countries, it was critical that Hitachi Vantara's pipelines operated as fast as possible.

Yet, over the course of many acquisitions developer groups were struggling to share information across siloed systems.

They needed a common approach to better manage their organizational software supply chain.

IT'S REALLY CRITICAL THAT WE MAKE OUR PIPELINES AS FAST AS THEY CAN BE,"

- DEVSECOPS SR. MANAGER LARRY GRILL

This multisite architecture accelerated their pipelines, reducing build times by as much as 25-30%. JFrog's replication speed enabled the team to avoid waiting for large file transfers, while our Xray solution protected their entire supply chain against known vulnerabilities."

With an industry-leading ability to manage and share binaries with metadata for all 14 required package types across multiple sites JFrog's Artifactory solution was the perfect fit. JFrog provided three on-premises platform deployments to serve up to 700 engineers by replicating key repositories for geolocality at each site.

"THE CAPABILITIES OF ARTIFACTORY ARE WHAT ALLOW US TO DO WHAT WE CAN DO TODAY...WITH XRAY, [SECURITY] IS A NO-BRAINER – IT'S BUILT IN, JUST TURN IT ON, WOW! I'LL TAKE THAT ALL DAY LONG."

– LARRY GRILL, DEVSECOPS SR. MANAGER

Hitachi Vantara

HOW DID JFROG HELP A FINANCIAL SERVICES FIRM ACCELERATE THEIR CLOUD-NATIVE DEVELOPMENT?

INVESTMENT MANAGEMENT SERVICES

CUSTOMER STORY

A Fortune 500 global investment management company that provides financial products and services to more than 40 million individuals were ready to enact a digital transformation that would enable the next gen set of digital experiences for their customers.

Yet they were reliant on open-source software to deliver value quickly, leaving them vulnerable to various risks."

"SECURITY IS CENTRAL TO OUR ENTIRE CLOUD STRATEGY. THE MOST IMPORTANT THING IS OUR CUSTOMER'S SAFETY AND TO HONOR THEIR TRUST."

JFrog provided a platform to help them accelerate cloud-native development while establishing security standards and best practices to pave the way for innovation with safety and compliance.

The firm was able to use Artifactory as the single source of truth for its over 4,600 internal and external applications that result in more than 10,000 artifacts deployed on a weekly-to monthly basis.

With all artifacts stored centrally in Artifactory repositories, Xray continuously scans the company's applications to make sure their entire software supply chain is secure and compliant with external industry standards as well as the firm's internal security audit and risk controls.

By engaging with JFrog they were able to ensure they had the reliability and resiliency to always be there for their customers.

"IF EVERY TEAM HAD TO DO THAT MANUALLY, ARTIFACT BY ARTIFACT, WE WOULDN'T BE DELIVERING ANY VALUE TO OUR CUSTOMERS."

HOW DID JFROG HELP A GLOBAL FINTECH PROVIDER SCALE AND SECURE DEVOPS?

FINTECH POWERHOUSE

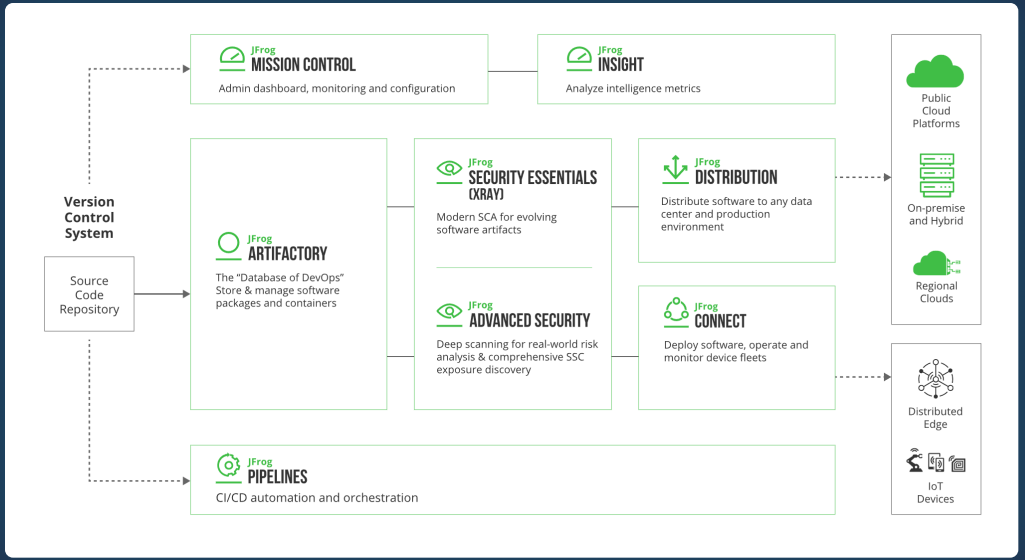

CUSTOMER STORY

A leading fintech powerhouse charged with providing a vast array of digital financial services to both individuals and businesses needed a centralized, scalable and technology-agnostic repository.

They had no central artifact record and lacked visibility into the lifecycle of the binary software packages as they were built, tested and released, requiring lots of maintenance and impacting system reliability and performance

Using JFrog Artifactory, JFrog Xray and JFrog Distribution helped the company transform their DevOps processes, optimizing agility, security, compliance, scale and efficiency.

With Artifactory as its central artifact repository manager they were able to track binaries from the time they're created to their deployment in production.

"HAVING THIS TRACE THAT TELLS YOU WHERE THIS ARTIFACT CAME FROM, AND WHETHER IT HAS BEEN SCANNED FOR VULNERABILITIES AND COMPLIANCE ISSUES IS SUPER IMPORTANT FOR US."

Managing and securing software supply chains with a single system ensures everyone is able to collaborate effectively. This enhances efficiency and security, while concurrently producing a reliable, consistent, and auditable software delivery process. JFrog offers the only software supply chain platform that gives you end-to-end visibility, security, and control for automating delivery of trusted releases.

As a company with a rich history working with the developer community and as developers ourselves, JFrog is a trusted partner singularly focused on empowering software creators to deliver quality software faster.
