

EVIDENCE COLLECTION

SOLUTION SHEET - CAPABILITY SPOTLIGHT

YOUR SINGLE SOURCE OF SDLC PROOF

Accelerate trusted software delivery and audits
through a verifiable trail of signed evidence

CAPTURE

Collect all evidence with
just one system of record

VERIFY

Ensure the readiness of
software releases

PROTECT

Set the foundation for audit,
governance, and compliance

THE CHALLENGE

Evolving regulations and software supply chain risks are threatening profits and access to key markets.

There's a pressing need for governance and auditability, but manual attestation processes don't scale, leading to delayed releases, overwhelmed developers, frustrated auditors, and lost customers.

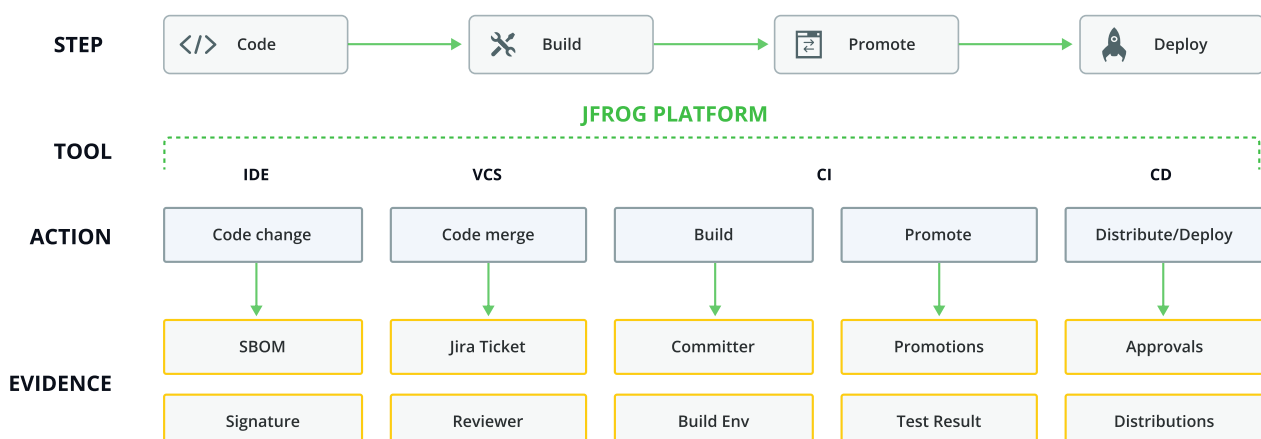

THE SOLUTION

Capture the security, quality, and operational steps to build production-ready software.

JFrog's Evidence Collection aggregates evidence metadata to one system of record. Drive reliable, secure, and governed releases without hindering velocity and morale.

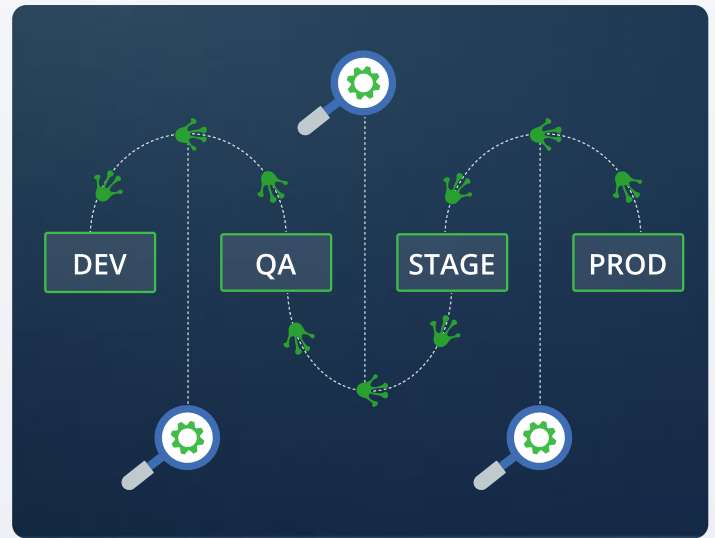

Attestation of the Entire SDLC

COLLECT SIGNED EVIDENCE ANYWHERE, ATTACHABLE AS AN INPUT FOR
ATTESTATION, GOVERNANCE, AUDITING, AND COMPLIANCE.

NO MORE SCREENSHOTS AND SPREADSHEETS

- **Capture** proof of the actions taken on software as it matures for release
- **Search** for evidence in one trusted source, not multiple point solutions
- **Attest** to the quality, security, and integrity of your software

Features and Benefits

EXTENSIBLE SDLC COVERAGE

- Collect and document evidence metadata from anywhere in the SDLC
- Document actions taken in the JFrog Platform, including Xray scans, promotion, and distribution
- Access seamless, built-in integrations to effortlessly connect with a growing number of external tools

EVIDENCE-ENABLED QUALITY CONTROLS

- Query evidence through GraphQL APIs
- Extract evidence metadata for exposure in attestation workstreams

FLEXIBLE EVIDENCE ATTACHMENT OPTIONS

- Attach evidence to an artifact, package, build, or Release Bundle
- Leverage the JFrog CLI or REST APIs for developer-friendly evidence linkage

STREAMLINED SOFTWARE RELEASE AUDITING

- View all release evidence in one location
- Export evidence data for consumption
- Query for CI policy

The Leading Platform for Software Supply Chain Governance

With cloud-native performance and hybrid flexibility, JFrog empowers DevSecOps organizations around the globe to curate, secure, manage, and deliver the building blocks of all their mission-critical applications at scale.
